WHAT DID ARJUN OBSERVE?

DO YOU KNOW?

* **Land of the Midnight Sun**

In summer, places near the North Pole like Norway have sunlight even at midnight!

* **Longest Day**

The longest day of the year is called the Summer Solstice - around June 21!

* **Longest Night**

The longest night is the Winter Solstice - around December 21. Cozy and starry!

LABEL ME

Label the part of earth where you live and color it as day. and part of earth where it is night color it in night colors
